

# Ranking of scientists in Turkish Institution to their GSC public profiles

## Third edition

This edition was built with data collected during the **third week of March 2015** from the working in **Turkish** (Turkey, Europe/Asia) institutions. It is a **BETA** Ranking of the scientist (voluntarily) presence in the **Google Scholar Citations** database. We advise to those inteditions to sign into these databases, correcting and updating their public profiles.

There are still **MANY mistakes and gaps** in the list, so please contact us ([isidro.agu](mailto:isidro.agu)) any of the errors for solving them promptly.

The list consists of the **Top 2600 profiles** (including former PhD students and no-papers in the past with this affiliation) ranked first by h-index in decreasing order and, when number of citations as a secondary criteria.

**Google Scholar Citations Profiles**

GS is a **free** very large bibliographic database that it is especially useful for bibliometric number (and lists them) of citations received by the items included. Its current size is over 1 many of them with links to openly available full-text versions). This is almost three times paywalled competitors like WoS/Thomson or Scopus/Elsevier.

**GS Citations** is a tool for setting up author profiles of individuals and their publications many advantages in generating your own profile using GSC. It is really very easy to use account to start collecting your publications and the associated metrics. The system is very every step offering candidate publications (with a very low error rate) and the possibility records.

### How to set up your own profile (and few advices and warnings)

There are several presentations with easy instructions that can help you in the process collections in English and Spanish:

- \* [How to set up your Google Scholar profile in Google Scholar Citations \(Sarah Goodier\)](#)
- \* [Como crear perfil de investigador en Google Scholar Citations \(Julio Alonso Arévalo\)](#)

Please, follow the following advices and take into account the warnings about nasty practices:

- Make the profile **public!**
- **Delete duplicate old profiles. Entries marked # means there are other profiles for the same name.**
- Identify yourself with your standard signature name (not inverse)
- Provide information about your affiliation, including institution name, city and country
- Use an institutional email account
- Use keywords in English (about 5) for allowing comparisons with international colleagues
- Preferably, neither general terms (physics, chemistry, medicine) nor very specific ones
- **Hey! Delete all these entries not being authored by you!**

### Information about the updates

The rankings are updated without a fixed frequency. When the number of new profile important mistake is discovered, then the data for the **full list of the country scientists** in the Google Scholar database is updated daily and many profiles can change abruptly in a few days it is recommended (for comparison purposes) to refresh individual accounts. Please, take into account that in fact small changes in your profiles and even a large increase in your citations or h-index personal count could mean you are ahead when comparing with others with a faster growing rate!

This ranking has been funded by the **Project ACUMEN**, European Commission 7th Framework Programme, Capacities, Science in Society 2010.01.01-2013.01.01 and the CSIC Intramural 201310E040
