Ranking of scientists in Turkish Institutions according to their Google Scholar Citations public profiles

Fifth edition

This edition was built with data collected during the **first week of October 2015** from the public profiles of researchers working in **Turkish** (Turkey, Europe/Asia) institutions. It is a **BETA** Ranking of the scientists according to their declared (voluntarily) presence in the **Google Scholar Citations** database. We advise to those interested in appearing in future editions to sign into these databases, correcting and updating their public profiles.

There are still **MANY** gaps in the list, so please contact us (isidro.aguillo@csic.es) if you discover any of the errors for solving them promptly. You need to have a public profile like this:

<http://scholar.google.com/citations?user=SaCSbeoAAAAJ&hl=en>

The list consists of the **Top 5000 profiles** (including former PhD students and no-longer members who signed papers in the past with this affiliation) ranked first by h-index in decreasing order and, when ties appear, then by the total number of citations as a secondary criteria.

New rankings of author profiles

In order to complement the institutional-level information we are developing a new project, the ranking of scientists based on their performance according to their **Google Scholar Citations** public profiles. Several countries are already available and new ones are being lists:

World				
Top Scientists (h>100) Jan'16				
SELECTED TOPICS				
Nanoscience & Nanotechnology SOON				
LATIN AMERICA				
Argentina	Chile	Uruguay UPDATED	Bolivia UPDATED	Paraguay Jan'16
Peru UPDATED	Ecuador UPDATED	Colombia Jan'16	Venezuela UPDATED	Brazil UPDATED
Panama UPDATED	Costa Rica UPDATED	Honduras	Nicaragua	El Salvador UPDATED
Mexico UPDATED	Guatemala	Cuba	Dominican Republic	Puerto Rico
The Gulf

Nigeria UPDATED	Kenya NEW	Botswana NEW	Ghana NEW	South Africa NEW
Namibia NEW				Egypt CANCELLED
New Zealand NEW				
Spain				
				Spain Jan'16

Google Scholar Citations Profiles

GS is a **free** very large bibliographic database that is especially useful for bibliometric purposes as it provides the number (and lists them) of citations received by the items included. Its current size is over 160 million unique documents, many of them with links to openly available full-text versions). This is almost three times the current coverage of the paywalled competitors like WoS/Thomson or Scopus/Elsevier.

GS Citations is a tool for setting up author profiles of individuals and their publications as covered by GS. There are many advantages in generating your own profile using GSC. It is really very easy to use as you only need a Google account to start collecting your publications and the associated metrics. The system is very powerful and it guides you in every step offering candidate publications (with a very low error rate) and the possibility of merging, delete or adding records.

How to set up your own profile (and few advices and warnings)

There are several presentations with easy instructions that can help you in the process. We cite these two slides collections in English and Spanish:

- * [Google Scholar: How to set up your profile](#)
- * [Como crear perfil de investigador en Google Scholar Citations \(Julio Alonso Arévalo\)](#)

Please, follow the following advices and take into account the warnings about nasty practices:

- The profile should be **'public'**. Otherwise nobody could access to your information or contact with you
- If you have several email addresses for accessing your Google account, probably you have two or more Google Scholar Citations profiles. Please, delete duplicate old profiles as it is very confusing for readers and complex to maintain by yourself
- **Entries marked # means there are other profiles for the same author. Numbers after names means there are other authors with the same name.**
- If your name is common the best advice is to disable the automatic updating. The system could add to your profile (a lot of) papers that are signed by other scientists with a similar name
- **It is important to delete all the entries not being authored by you, as the profile can be excluded until it is cleaned**
- Contact with your colleagues or co-authors if you discover they are not maintained properly their profiles

Isidro F. Aguillo FULL NAME, FAMILY NAME LAST
(ORCID:0000-0001-8927-4873) IDENTIFIER COUNTRY
Cybermetrics Lab. IPP. Consejo Superior de Investigaciones Cientificas. SPAIN
Webometrics, Scientometrics, Bibliometrics, Research evaluation, Open access
Verified email at csic.es - Homepage KEYWORDS IN ENGLISH
INSTITUTIONAL EMAIL DOMAIN

- Identify yourself with your standard signature name (not inverse)
- Add the [ORCID identifier](#), with the following syntax without blank spaces (ORCID:1234-56789-8765-4321)
- Provide information about your affiliation, including **institution name and country**
- Use an **institutional email account**
- Use **keywords in English** (about 5) for allowing comparisons with international colleagues
- Preferably, neither general terms (physics, chemistry, medicine) nor very specific ones

Information about the updates

The rankings are updated without a fixed frequency. When the number of new profiles reach a 'critical mass' or an important mistake is discovered, then the data for the **full list of the country scientists** is collected. Although Google Scholar database is updated daily and many profiles can change abruptly in a few days it is both not feasible and not fair (for comparison purposes) to refresh individual accounts. Please, take into account that in fact changes can affect to many profiles and even a large increase in your citations or h-index personal count could mean you are losing ranks in the list when comparing with others with a faster growing rate!

This ranking has been funded by the **Project ACUMEN**.
European Commission 7th Framework Programme, Capacities, Science in Society 2010. Grant Agreement 266632
and the CSIC Intramural 201310E040

IMPORTANT!: All scientists with duplicated profiles (marked # in the rankings) will be removed in future editions unless they delete their extra entries
